SOD INSTALLATION

HERE'S WHAT WE DO TO GET THE JOB DONE RIGHT

1 OLD SOD REMOVAL

Using our sod cutter we remove 2" of old sod (included in price). We do not rototill. Rototilling mixes the old weeds into the new soil creating a high chance of them coming back.

2 SOIL INSTALLATION

Supply and install up to 3" of triple mix soil (included in price). With a mixture of peat moss, composite, and topsoil, it is packed with the right stuff to keep your lawn looking its best!

THE RIGHT ON **GOLD** STANDARD

3 SLOPING/ GRADING

Remove any lumps and bumps to ensure your new lawn is flat and has the best grade for your yard.

4 FERTILIZE

Apply turf starter fertilizer. This will help promote initial root growth.

5 SOD INSTALLATION

Supply and install 100% Kentucky Blue grass sod. Cut fresh from the sod farm the morning of installation. It is very important to install within the first 12 hours.

THE RIGHT ON **GOLD** STANDARD

6 ROLL NEW SOD

Roll your lawn using our 400lb roller to both compress the sod to the soil and to remove any air pockets, smoothing out any bumps along the way.

7 WATERING LAWN

Water your lawn using the homeowners water. One time after installation. The first watering is the most important.

8 SOD WARRANTY

Right On Landscaping offers a 100% guarantee that your sod will grow and if any pieces die due to being unhealthy we will come back and replace it. Free of charge.

THE RIGHT ON **GOLD** STANDARD

■ WATERING NEWLY LAID SOD

Water is the single most important tip for successful sod installation.

■ WATER IMMEDIATELY

Our basic rule has always been: A half inch of water in the first 10-15 minutes is better than 3 inches of water a few hours later.

■ WATER DEEPLY

To maximize results, the ground must be kept moist.

! IMPORTANT: Ensure water has penetrated the sod by lifting a corner and checking the ground beneath.

WATERING SCHEDULE

	Week 1	Week 2	Week 3
Day 1			
Day 2			
Day 3			
Day 4			
Day 5			
Day 6			
Day 7			

WATERING GAUGE TIP

1. To gauge watering, simply place an empty straightedge can or container about 6 feet away from the sprinkler.
2. When there is a half inch of water in the can, it is time to move the sprinkler to the next area.
3. Reflected heat along the building dries sod quickly. Be sure to water these areas more often.

■ MOWING NEWLY LAID SOD

For best results, mow your new sod 7 days after installation and perpendicular to the direction it was laid. Adjust your cutting height if needed.

! IMPORTANT: The most common and disastrous installation mistake is **NOT** mowing 6-7 days after installation.

■ MOWING ESTABLISHED SOD

For best results, mow your new sod 7 days after installation and perpendicular to the direction it was laid. Adjust your cutting height if needed.

MOWING TIP

1. Your new living carpet needs mowing 6-7 days after installation.
2. The basic mowing rule: never remove more than 1/3 of the leaf blade during a single mowing.
3. Set your mower at a cutting height of approximately 2 1/4".
4. For best appearance and better resistance to disease, be sure to keep your mower blades sharp.

■ ABOUT US

Founded in 2017.

Starting as a two person team working long hours, we've worked hard since 2017 to build ourselves into a trustworthy local company you know will do the job, and leave you with a yard you will want to showcase to the world!

We owe it to our clients for always challenging us and making us want to be better. With Right On Landscaping, you're not just getting some yard work done. You're getting the yard you've always dreamed about!

■ FAQ

WHAT IS OUR BOOKING PROCESS?

Our booking process typically goes as follows:

1. Call us at 226.750.0360 or fill out the form on our contact page.
2. We will contact you and set up an appointment.
3. Our estimator will conduct your free estimate.
4. Once the details of the project are worked out, a 10% deposit is required to secure your spot.
5. We will schedule your installation start date.
6. You will be notified two (2) weeks prior to your installation start date.

DO WE GUARANTEE THE WORK WE DO?

The simple answer is yes. Once we install sod in your yard, we will give you a watering schedule and as long as it is followed, your grass is guaranteed to grow. If by some chance it doesn't grow, we will put you on the repair list and be back to replace it, free of charge.

We also offer a 2 year workmanship warranty on all our stone work. Our goal is to make you happy!

IS RIGHT ON LANDSCAPING INSURED?

We get this one a lot! We are insured through WSIB, have a \$2 million liability, as well additional insurance for pool installations. We want all of our clients to have peace of mind knowing the company and employees are fully insured and you and your home are protected.

WHAT IS OUR BOOKING PROCESS?

How long does the average sod installation take?

The average length of a sod installation for Right On Landscaping is one (1) day.

WHEN ARE WE BOOKING JOBS FOR 2022?

We are now booking sod and softscaping for spring 2022. We book enough jobs to complete the year, and we do around one per day so spots fill up fast.

WHAT METHODS OF PAYMENTS DO WE ACCEPT?

We accept the following forms of payment:

1. Visa
2. Mastercard
3. Cheque
4. E-Transfer
